

INSTRUCTIONS TO RUN MORSE CODE FILE

- Create a Folder immediately beneath C:\ called “morsecode”.
- Download two files (BASICA.EXE and MORSECOD.BAS) to your PC. Place them in the Folder named “morsecode”.
- Ensure that the folder (morsecode) is immediately beneath C:\
- Click on your **START** button (bottom left of screen) and then select **RUN**.
- Enter “**CMD**” in the dialogue box, then press ENTER, you will then be presented with the DOS COMMAND box (see Fig 1 below)

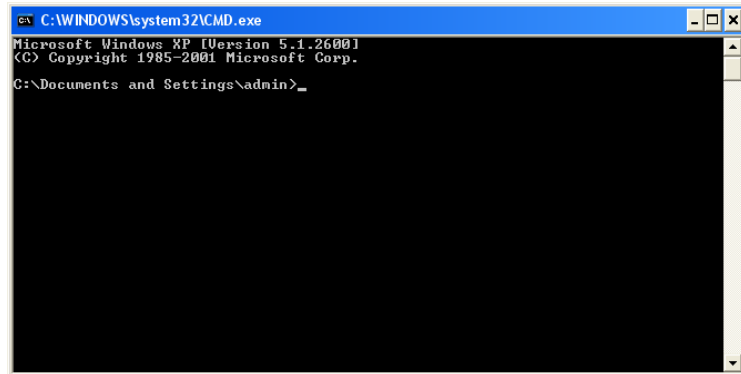

Figure 1

- If you are not at the C:\ prompt, keep entering “**cd..**” until you are. See Figure 2 below

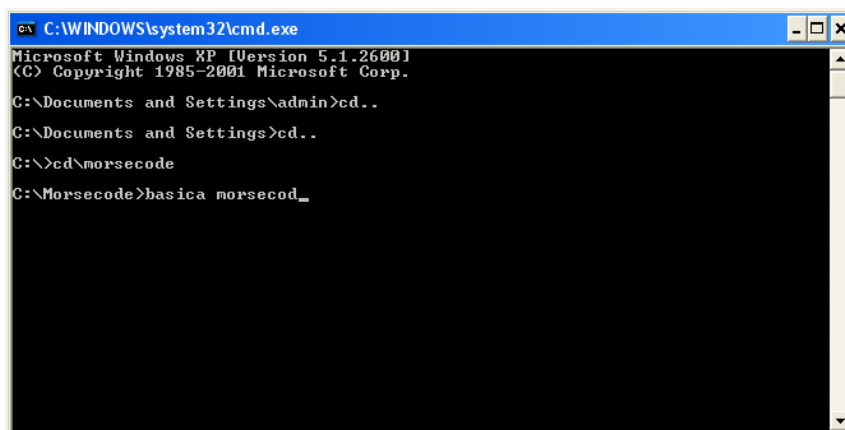

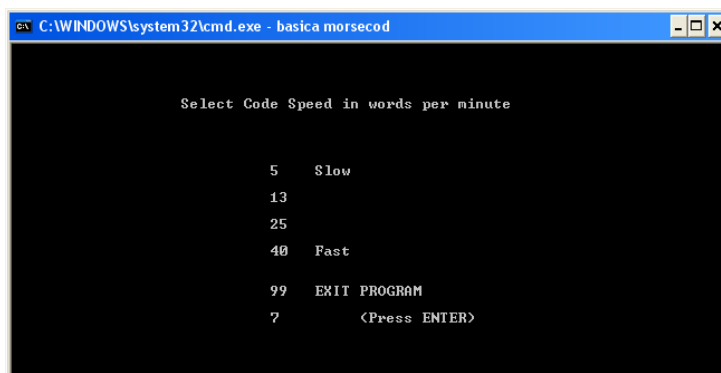

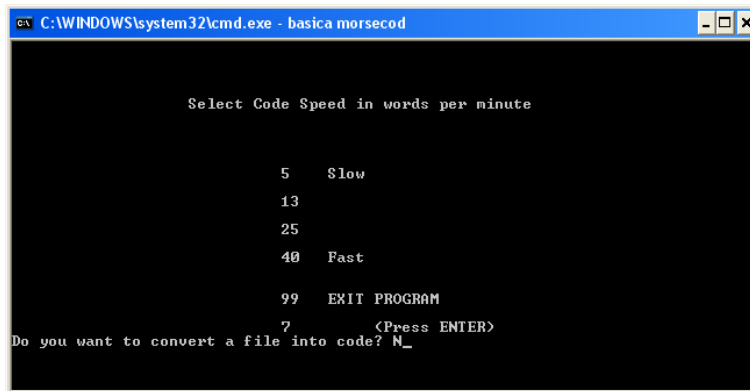

Figure 2

- Next enter “**cd\morsecode**”, followed by **ENTER**
- Then enter “**basica morsecod**” followed by **ENTER**

You should now see the following screen:
