

Aviation (Advanced Diploma in Aviation Studies) and Management (Bachelor of Commerce)

Western Australian
Aviation College

& Murdoch University

Aviation (Advanced Diploma in Aviation Studies) and Management (Bachelor of Commerce)

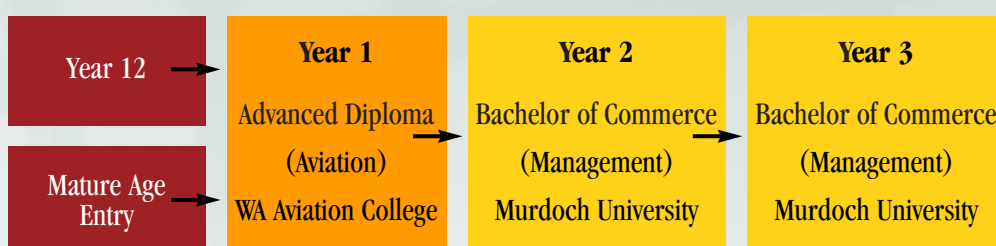

Aviation is both an exciting and challenging industry. Finding employment within this industry is competitive and the psychological demands on a pilot are substantial. Later in their careers, many pilots progress into management roles for which recognised training is essential and extensive experience vital.

The Western Australian Aviation College offers excellence in pilot training and the opportunity for graduates to continue their studies in Management at Murdoch University with this dual qualification.

These two highly recognised qualifications can be completed in three years. This combination will enhance employability and offers far more career opportunity. The theoretical and practical flying training (Advanced Diploma in Aviation) is completed at the College facilities, Jandakot Airport using specialists from civil and military aviation. The Bachelor of Commerce degree in Management follows at Murdoch University.

Combination Qualification

Admission requirements

Applicants for the Advanced Diploma in Aviation Studies are admitted on the basis of the following criteria:

- Completion of Year 12
- Mature age entry also available
- An IELTS band width score of no less than 6.0 in any section (overseas students)
- Successful completion of an aptitude test and interview

Normal undergraduate admission requirements apply to entry to the Bachelor of Commerce.

HECS places available to domestic students for Years 2 & 3 (subject to availability). Austudy available Year 1.

Aviation (Advanced Diploma in Aviation Studies) and Management (B.Com)

This dual qualification offers a Commercial Pilot Licence followed by management studies. This will provide a very valuable set of skills for Commercial Pilots who aspire to management roles in aviation, as well as providing a second qualification for professional pilots who wish to have an alternative career path available.

In addition to a Commercial Pilot Licence, the Advanced Diploma in Aviation Studies provides the graduate with the theory training required to hold an Air Transport Pilot Licence. This education greatly increases graduates' employability, by providing career opportunities at all levels of aviation including major airlines. By being conducted at Australia's busiest airport, it allows students to be immersed in an aviation environment for the one-year duration of the course.

The Commerce degree provides a general education in management. It is not aviation-specific, so it provides career opportunities in a broad range of industries, of which the dynamic and highly competitive field of aviation is just one. The study of management explores many relevant topics, theories and perspectives to better prepare a graduate for managerial life in the twenty-first century.
